GNU LESSER GENERAL PUBLIC LICENSE

Version 2.1, February 1999
Copyright (C) 1991, 1999 Free Software Foundation, Inc.
51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

This is the first released version of the Lesser GPL. It also counts as the license of the GNU Library Public License, version 2, hence the version number 2.1.

Preamble
The licenses for most software are designed to make sure you have the freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software to make sure it remains free for all its users.

This license, the Lesser General Public License, applies to some programs that are distributed with or without source code for the Free Software Foundation and are licensed to you under the GNU General Public License. You may not distribute such programs without source code for the Free Software Foundation, but you may not copy, modify, or distribute them in any way that is not permitted by the GNU General Public License, unless you are explicitly permitted to do so in writing by the copyright holder.

When we speak of free software, we are referring to freedom of use, not to the price of the software. We charge some prices for our software, but we do not charge more for the software than we do for the paper on which it is written, and we charge no more than the cost of distribution. We charge some prices for our software, but we do not charge more for the software than we do for the paper on which it is written, and we charge no more than the cost of distribution.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to impose on you additional restrictions. These restrictions translate to certain responsibilities for you if you distribute copies of the library or of any program that uses a library.

For example, if you distribute copies of the library, whether gratis or for a fee, you must also distribute to each recipient all the rights that we gave you in the license for the library. You must make sure that the license for the library is clearly visible in the documentation of each program that uses the library. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink their programs with the library after making changes to the library and relinking it. You must also make sure that the license for the library is clearly visible in the documentation of each program that uses the library.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you the right to distribute copies of the library under certain conditions.

To protect each distributor, we want to make it very clear that there is no warranty for the library. Also, if the library is modified by someone else and passed on, the recipients should know that they have no warranty, and that the original author is not responsible. No warranty is provided, so that the original author is not responsible.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot take advantage of patents to restrict the distribution of our library. No patent can be asserted against our library, and no patent can be asserted against our library.

Most GNU software, including some libraries, is covered by the GNU General Public License. This license has the same goals and principles as the GNU General Public License, but it also permits linking to other libraries covered by the GNU Lesser General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The GNU General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does less to protect the user's freedom than the ordinary General Public License. It also permits other kinds of copying to be done, as an advantage over copying non-free programs. These disadvantages are: (1) you cannot sue for patent infringement, and (2) you cannot sue for patent infringement.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, to meet an urgent need. In such a case, the copyright holder may wish to allow the copying of the library for a limited period of time, to meet a special need. In such a case, the copyright holder may wish to allow the copying of the library for a limited period of time, to meet a special need.

In order to make a distribution of a particular library to a program available, a "special" version of the library is used. This version is not covered by the GNU General Public License, but it is covered by the GNU Lesser General Public License. This version is not covered by the GNU General Public License, but it is covered by the GNU Lesser General Public License.

Although the Lesser General Public License is less protective of the user's freedom, it does ensure that the library is free software and that the library is free software and that the library is free software.

The precise terms and conditions for copying, distribution and modification are given in the license. For a complete list of conditions, see the license. For a complete list of conditions, see the license.

Each licensee has responsibilities, see the terms of this license. Each licensee has responsibilities, see the terms of this license.

A library's user has responsibilities, see the terms of this license. A library's user has responsibilities, see the terms of this license.

The "library" below, refers to any software library or work which has been distributed under these terms. A work based on the library, means either the library or any derivative work based on the library. That is to say, a work containing the library or a portion of it, either verbatim or with modifications and/or translated into another language. "Derivative" translation is defined without limitation in the License Modification.

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, this means the source code, including all interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this license. They are outside its scope. The act of running a program using the library is not restricted, and neither is the act of linking to the library. For a complete list of conditions, see the license.

1. You may copy and distribute verbatim copies of the library's source code as you receive it, in any medium, provided that you prominently and unambiguously put on each copy appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this license and to the absence of any warranty; and distribute a copy of this license along with the library.

You may charge a fee for the physical act of transferring a copy, and you may at your option charge warranty protection in exchange for a fee.

2. You may modify your copy or copies of the library or any portion thereof to meet your needs, and you may distribute modified versions of the library to others, provided that you also meet all of these conditions:

a) The modified work must itself be a software library.

b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.

c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this license.

d) If by facility in the modified library refers to a function or a table, the facility, other than the one you added based on the facility, is licensed to you under the terms of the license. If the facility, other than the one you added based on the facility, is licensed to you under the terms of the license, you must make a good faith effort to ensure that the facility, other than the one you added based on the facility, is licensed to you under the terms of the license.

(For example, a function in a library to compute square roots has a purpose which is widely useful, and which is not a function which is specific to a particular application. However, the function which computes square roots for a particular application is not a function which is widely useful, and which is not a function which is specific to a particular application.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the library, and can be reasonably considered independent and separate works in themselves, then this license does not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the library, the distribution of the whole must be on the terms of this license, unless you do so under and for each and every recipient of the work.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to ensure that the library is free for all its users and the library is free for all its users.

In addition, mere aggregation of another work not based on the library with the library (or with other works based on the library) as a whole or a storage of distribution medium does not bring the other work under the scope of this license.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this license to a given copy of the library. To do so, you must alter all the notices that refer to this license, so that they refer to the ordinary GNU General Public License, version 2, instead of to this license. If a user receives this version 2 of the license of this license, it is a user receives this version 2 of the license of this license.

the Library.

We call this license the "Lesser" General Public License because it does not restrict the user's freedom to change the software. General Public License. It also provides other free software developers with a framework and structure for their programs. These arrangements are intended to be the primary means of public license for free libraries. However, the Lesser License provides advantages in certain special circumstances.

For example, in rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de facto standard. To address this, non-free programs must be allowed to use the library. A user program may do this if it uses, directly or indirectly, the library. A user program may do this if it uses, directly or indirectly, the library to free software only, as well as the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs may be needed. For example, permission to use the GNU C Library or the GNU C++ Library is needed to use the GNU C++ operating system, as well as the GNU C++ operating system, as well as the GNU C++ operating system.

Although the Lesser General Public License is less protective of the user's freedom, it does ensure that the user of a program that is linked with the library has the freedom and the opportunity to run that program with a modified version of the library.

The precise terms and conditions for copying, distribution and modification follow. For those programs that are distributed under a "work based on the library" and a "work that uses the library", the terms contain some special provisions for the library, which are later must be combined with the library in order to run.

ONE LICENSE OR MORE LICENSES

8. This license agreement applies to the software library or other program which contains a notice placed by the copyright holder or other party that the software is licensed under this license. Each license is addressed as "you".

A "library" means a collection of software functions and/or data organized as an object code or a dynamically linked software program.

The "library", below, refers to any such software library or work which is licensed under this license. A "work based on the library" means either the library or any derivative work under copyright, for example, a program which uses the library or a program which is derived from the library. A "work that uses the library" means either a program which is derived from the library or a program which is derived from the library.

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, this means the source code. For a work based on the library, this means the source code for all modules it contains, plus any associated interface definition files, plus the source code for any external components and interfaces of the library.

Activities other than copying, distribution and modification are not restricted by this license. They are not restricted by this license. Activities other than copying, distribution and modification are not restricted by this license. They are not restricted by this license. Activities other than copying, distribution and modification are not restricted by this license. They are not restricted by this license.

3. You may copy and distribute verbatim copies of the library's source code as you receive it, in any medium, provided you keep intact all the notices that refer to this license and to the absence of any warranty; and distribute a copy of this license along with the library.

You may charge a fee for the physical act of transferring a copy, and you may set your own price for subsequent copies.

3. You may modify your copy or copies of the library or any portion of it, then forming a work based on the library, and copy and distribute such modifications or your work under the terms of section 1 above, provided that you also meet all of these conditions:

a) The modified work must itself be a software library.

b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.

c) You must cause the whole of the work to be licensed at no charge to all recipients under the terms of this license.

d) If a facility in the modified library refers to a function or a data structure that is not defined in the library, you must either modify the facility, or use a name that does not conflict with the name of any function or data structure defined in the library, and rename the facility so that it does not conflict with the name of any function or data structure defined in the library.

(For example, a function in a library to compute square roots may be called "sqrt", but a function in a library to compute square roots may be called "sqrt2".) However, modification of names to refer to other functions or data structures does not change the name of the function or data structure.

These requirements apply to the modified work as a whole. If you modify the library, you must also modify the work based on the library. However, these requirements do not apply to those sections of the work which are not derived from the library. For example, you may distribute the work based on the library, the distribution of the whole must be on the terms of this license, and the distribution of the whole must be on the terms of this license.

4. You may copy and distribute copies of the library's source code as you receive it, in any medium, provided you keep intact all the notices that refer to this license and to the absence of any warranty; and distribute a copy of this license along with the library.

5. You may modify your copy or copies of the library or any portion of it, then forming a work based on the library, and copy and distribute such modifications or your work under the terms of section 1 above, provided that you also meet all of these conditions:

a) The modified work must itself be a software library.

b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.

c) You must cause the whole of the work to be licensed at no charge to all recipients under the terms of this license.

d) If a facility in the modified library refers to a function or a data structure that is not defined in the library, you must either modify the facility, or use a name that does not conflict with the name of any function or data structure defined in the library, and rename the facility so that it does not conflict with the name of any function or data structure defined in the library.

(For example, a function in a library to compute square roots may be called "sqrt", but a function in a library to compute square roots may be called "sqrt2".) However, modification of names to refer to other functions or data structures does not change the name of the function or data structure.

These requirements apply to the modified work as a whole. If you modify the library, you must also modify the work based on the library. However, these requirements do not apply to those sections of the work which are not derived from the library. For example, you may distribute the work based on the library, the distribution of the whole must be on the terms of this license, and the distribution of the whole must be on the terms of this license.

6. You may copy and distribute copies of the library's source code as you receive it, in any medium, provided you keep intact all the notices that refer to this license and to the absence of any warranty; and distribute a copy of this license along with the library.

7. You may modify your copy or copies of the library or any portion of it, then forming a work based on the library, and copy and distribute such modifications or your work under the terms of section 1 above, provided that you also meet all of these conditions:

a) The modified work must itself be a software library.

b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.

c) You must cause the whole of the work to be licensed at no charge to all recipients under the terms of this license.

d) If a facility in the modified library refers to a function or a data structure that is not defined in the library, you must either modify the facility, or use a name that does not conflict with the name of any function or data structure defined in the library, and rename the facility so that it does not conflict with the name of any function or data structure defined in the library.

(For example, a function in a library to compute square roots may be called "sqrt", but a function in a library to compute square roots may be called "sqrt2".) However, modification of names to refer to other functions or data structures does not change the name of the function or data structure.

These requirements apply to the modified work as a whole. If you modify the library, you must also modify the work based on the library. However, these requirements do not apply to those sections of the work which are not derived from the library. For example, you may distribute the work based on the library, the distribution of the whole must be on the terms of this license, and the distribution of the whole must be on the terms of this license.

8. You may copy and distribute copies of the library's source code as you receive it, in any medium, provided you keep intact all the notices that refer to this license and to the absence of any warranty; and distribute a copy of this license along with the library.

9. You may modify your copy or copies of the library or any portion of it, then forming a work based on the library, and copy and distribute such modifications or your work under the terms of section 1 above, provided that you also meet all of these conditions:

a) The modified work must itself be a software library.

b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.

c) You must cause the whole of the work to be licensed at no charge to all recipients under the terms of this license.

d) If a facility in the modified library refers to a function or a data structure that is not defined in the library, you must either modify the facility, or use a name that does not conflict with the name of any function or data structure defined in the library, and rename the facility so that it does not conflict with the name of any function or data structure defined in the library.

(For example, a function in a library to compute square roots may be called "sqrt", but a function in a library to compute square roots may be called "sqrt2".) However, modification of names to refer to other functions or data structures does not change the name of the function or data structure.

These requirements apply to the modified work as a whole. If you modify the library, you must also modify the work based on the library. However, these requirements do not apply to those sections of the work which are not derived from the library. For example, you may distribute the work based on the library, the distribution of the whole must be on the terms of this license, and the distribution of the whole must be on the terms of this license.

10. You may copy and distribute copies of the library's source code as you receive it, in any medium, provided you keep intact all the notices that refer to this license and to the absence of any warranty; and distribute a copy of this license along with the library.

11. You may modify your copy or copies of the library or any portion of it, then forming a work based on the library, and copy and distribute such modifications or your work under the terms of section 1 above, provided that you also meet all of these conditions:

a) The modified work must itself be a software library.

b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.

c) You must cause the whole of the work to be licensed at no charge to all recipients under the terms of this license.

d) If a facility in the modified library refers to a function or a data structure that is not defined in the library, you must either modify the facility, or use a name that does not conflict with the name of any function or data structure defined in the library, and rename the facility so that it does not conflict with the name of any function or data structure defined in the library.

(For example, a function in a library to compute square roots may be called "sqrt", but a function in a library to compute square roots may be called "sqrt2".) However, modification of names to refer to other functions or data structures does not change the name of the function or data structure.

These requirements apply to the modified work as a whole. If you modify the library, you must also modify the work based on the library. However, these requirements do not apply to those sections of the work which are not derived from the library. For example, you may distribute the work based on the library, the distribution of the whole must be on the terms of this license, and the distribution of the whole must be on the terms of this license.

12. You may copy and distribute copies of the library's source code as you receive it, in any medium, provided you keep intact all the notices that refer to this license and to the absence of any warranty; and distribute a copy of this license along with the library.

13. You may modify your copy or copies of the library or any portion of it, then forming a work based on the library, and copy and distribute such modifications or your work under the terms of section 1 above, provided that you also meet all of these conditions:

a) The modified work must itself be a software library.

b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.

c) You must cause the whole of the work to be licensed at no charge to all recipients under the terms of this license.

d) If a facility in the modified library refers to a function or a data structure that is not defined in the library, you must either modify the facility, or use a name that does not conflict with the name of any function or data structure defined in the library, and rename the facility so that it does not conflict with the name of any function or data structure defined in the library.

(For example, a function in a library to compute square roots may be called "sqrt", but a function in a library to compute square roots may be called "sqrt2".) However, modification of names to refer to other functions or data structures does not change the name of the function or data structure.

These requirements apply to the modified work as a whole. If you modify the library, you must also modify the work based on the library. However, these requirements do not apply to those sections of the work which are not derived from the library. For example, you may distribute the work based on the library, the distribution of the whole must be on the terms of this license, and the distribution of the whole must be on the terms of this license.

14. You may copy and distribute copies of the library's source code as you receive it, in any medium, provided you keep intact all the notices that refer to this license and to the absence of any warranty; and distribute a copy of this license along with the library.

15. You may modify your copy or copies of the library or any portion of it, then forming a work based on the library, and copy and distribute such modifications or your work under the terms of section 1 above, provided that you also meet all of these conditions:

a) The modified work must itself be a software library.

b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.

c) You must cause the whole of the work to be licensed at no charge to all recipients under the terms of this license.

d) If a facility in the modified library refers to a function or a data structure that is not defined in the library, you must either modify the facility, or use a name that does not conflict with the name of any function or data structure defined in the library, and rename the facility so that it does not conflict with the name of any function or data structure defined in the library.

POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS.

How to Apply These Terms to Your Program

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively ensure the receipt of warranty, and each file should have at least the "copyright" line and a pointer to where the full notice is found.

One line to give the program's name and a brief idea of what it does.
Copyright (C) year, name of author

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation, either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 01103-1307 USA

Also add information on how to contact you by electronic and paper mail.
If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

Copyright (C) year, name of author
This program comes with ABSOLUTELY NO WARRANTY; for details see `./how-w/`.
This is free software, and you are welcome to redistribute it under certain conditions. See `./how-w/` for details.

The hypothetical commands `./w/` and `./how-w/` should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `./w/` and `./how-w/`; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; adapt it to the needs of your program.

Program, Inc., hereby disclaims all copyright interest in the program 'Commodore' (which means any and all computers) written by James Hacker.
Copyright (C) year, April 1989
By Don, President of Program, Inc.

The GNU General Public License does not permit incorporating your program into proprietary programs. If your program is a sublibrary of a proprietary program, use the GNU Library General Public License instead of this license. If it is not a sublibrary, use the GNU Library General Public License instead of this license.

Appendix A.2.1

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to make sure you give the freedom to those who have no charge. To protect the rights of those who write software, we have created the GNU General Public License, which you can use to protect the rights of those who write software. This license is intended to make sure that you can give your program to others, and that you can change the software or use copies of it in your programs, and that you know you can do these things.

To protect your rights, we have made certain restrictions that you must adhere to in order to protect the rights of those who write software. These restrictions are designed to make sure that you can give your program to others, and that you can change the software or use copies of it in your programs, and that you know you can do these things.

For example, if you distribute copies of such a program, whether you do so by hand or by machine, you must give the recipients of the program a copy of the same license. You must also make sure that you receive from the copyright holder for you if you distribute copies of the software, or if you modify it.

You must also make sure that you receive from the copyright holder for you if you distribute copies of the software, or if you modify it.

Finally, you must make sure that you receive from the copyright holder for you if you distribute copies of the software, or if you modify it.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This license applies to any program or other work which contains a notice that by copyright notice it may be distributed under the terms of the GNU General Public License. The "Program" refers to any such program or work, and "work based on the Program" means either the Program or any derivative work under copyright law; that is to say, a work containing the Program or a portion of it, whether or not it is a separate work, and whether or not it is distributed under the terms of the GNU General Public License. (Hereafter, "translation" is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities that are copying, distribution and modification are not covered by this license; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its content constitutes a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you see fit, in any medium, provided that you copy the whole of the source code, and that you copy the license and these conditions in its original form, and that you also make available a copy of this license and these conditions along with the Program.

2. You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

3. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications along with the Program, but you must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

4. If you modify the Program, you may distribute the modified version under the terms of the GNU General Public License, or under a license of your choice which is not less restrictive than the GNU General Public License. If you distribute the modified version under the terms of the GNU General Public License, you must make a copy of the GNU General Public License available to all recipients of the modified version.

5. If you distribute the modified version under a license of your choice, you must make a copy of the GNU General Public License available to all recipients of the modified version.

6. If you distribute the modified version under a license of your choice, you must make a copy of the GNU General Public License available to all recipients of the modified version.

7. If you distribute the modified version under a license of your choice, you must make a copy of the GNU General Public License available to all recipients of the modified version.

8. If you distribute the modified version under a license of your choice, you must make a copy of the GNU General Public License available to all recipients of the modified version.

9. If you distribute the modified version under a license of your choice, you must make a copy of the GNU General Public License available to all recipients of the modified version.

10. If you distribute the modified version under a license of your choice, you must make a copy of the GNU General Public License available to all recipients of the modified version.

11. If you distribute the modified version under a license of your choice, you must make a copy of the GNU General Public License available to all recipients of the modified version.

12. If you distribute the modified version under a license of your choice, you must make a copy of the GNU General Public License available to all recipients of the modified version.

13. If you distribute the modified version under a license of your choice, you must make a copy of the GNU General Public License available to all recipients of the modified version.

14. If you distribute the modified version under a license of your choice, you must make a copy of the GNU General Public License available to all recipients of the modified version.

15. If you distribute the modified version under a license of your choice, you must make a copy of the GNU General Public License available to all recipients of the modified version.

16. If you distribute the modified version under a license of your choice, you must make a copy of the GNU General Public License available to all recipients of the modified version.

17. If you distribute the modified version under a license of your choice, you must make a copy of the GNU General Public License available to all recipients of the modified version.

18. If you distribute the modified version under a license of your choice, you must make a copy of the GNU General Public License available to all recipients of the modified version.

19. If you distribute the modified version under a license of your choice, you must make a copy of the GNU General Public License available to all recipients of the modified version.

20. If you distribute the modified version under a license of your choice, you must make a copy of the GNU General Public License available to all recipients of the modified version.

21. If you distribute the modified version under a license of your choice, you must make a copy of the GNU General Public License available to all recipients of the modified version.

44. If you distribute the modified version under a license of your choice, you must make a copy of the GNU General Public License available to all recipients of the modified version.

Free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively ensure the notices of warranty, and each file should have at least the "Copyright" line and a pointer to where the full notice is found.

One line to give the program's name and a brief idea of what it does.
Copyright (C) year - name of author

This program is free software; you can redistribute it under certain conditions. See the GNU General Public License for more details.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

Copyright (C) year, name of author
This is free software; you are welcome to redistribute it under certain conditions. See 'info '(C)' for details.

The hypothetical command 'show w' and 'show c' should show the appropriate parts of the General Public License. Of course, the command you use may be called something other than 'show w' and 'show c'; they could even be abbreviations of some lines - whatever suits your program.

You should also get your neighbor (if you work in a programmer's job) about it, say, to sign a "Copyright Declaration" for the program, if necessary. Here is a sample; alter the names:

Heydemon, Doc: hereby declares his copyright interest in the program "Communication" (which makes passes at computers) written by James Naclor.

Copyright of Doc: 1 April 1988
By Doc, President of Fizz

This General Public License does not permit incorporating our program into proprietary programs. If your program is a subprogram of a proprietary program, you may use the code of this library in your proprietary applications with the GNU Public License instead of this License.

Jeanpp 1.0.2

The Jeanpp library's source code, including accompanying documentation, text and documentation applications, are licensed under the following conditions:

Reproduce as-is and the Jeanpp Authors explicitly disclaim copyright in all jurisdictions which recognize such a disclaimer. In such jurisdictions, this software is released into the Public Domain.

In jurisdictions which do not recognize Public Domain property (e.g. Germany or of Switzerland), this software is licensed under the terms of the GNU General Public License (GPL), version 2, and is released under the terms of the MIT license (see below).

In jurisdictions which recognize Public Domain property, the user of this software may choose to accept it either in the Public Domain, or under the terms of the GNU General Public License (GPL), version 2, or the MIT license (see below).

The MIT license is about as close to Public Domain as a license can get, and is described in detail, usually terms at

http://en.wikipedia.org/wiki/MIT_License
The full text of the MIT License follows:

=====
Copyright (c) 2007-2010 Ragnire Legleiter and the Jeanpp Authors
Permission is hereby granted, free of charge, to any person obtaining a copy of this software and associated documentation files (the "Software"), to deal in the Software without restriction, including without limitation the rights to use, copy, modify, merge, publish, distribute, sublicense, and/or sell copies of the Software, and to permit persons to whom the Software is furnished to do so, subject to the following conditions:

The above copyright notice and this permission notice shall be included in all copies of substantial portions of the Software.

THE SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT. IN NO EVENT SHALL THE AUTHOR BE LIABLE FOR ANY CLAIM, DAMAGES OR OTHER LIABILITY, WHETHER IN AN ACTION OF CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF OR IN CONNECTION WITH THE SOFTWARE OR THE USE OR OTHER DEALINGS IN THE SOFTWARE.

=====
(END LICENSE TEXT)

The MIT license is compatible with both the GPL and commercial software, offering one side of the coin of Public Domain with the software, offering one side of the coin of Public Domain with the license text in the source code. Note also that by accepting the Public Domain License you are not releasing your own software into the Public Domain.

If you are a distributor who has received this code from the FSF, you should redistribute it under the terms of the GNU General Public License (GPL), version 2, and is released under the terms of the MIT license (see below).

This is the first released version of the Lesser GPL. It also contains text from the original GNU Library Public License, version 2, hence the version number of 2.1.

=====
The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU Lesser General Public License is designed to guarantee your freedom to share and change free software - to make sure the software is free for all users.

This license, the Lesser General Public License, applies to some smaller pieces of software that are used to allow you to do more large-scale software development. For more information, see the GNU Lesser General Public License (LGPL) website at <http://www.gnu.org/licenses/lgpl.html>.

This license, the Lesser General Public License, is the better license to use if you are a distributor of free software, because it lets you take advantage of the protection of copyright without the obligations of the full General Public License (GPL).

When we speak of free software, we are referring to freedom of use, not to the price of the software. We think it would be very nice of you to pay a reasonable price for a program when you use the program to distribute copies of free software (and charge for this service if you wish), but we do not consider this to be a condition for the distribution of free software. If you are not a distributor of free software, you can do whatever you like with your copies of the program, without charge.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to refrain from exercising them. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must ensure that the recipients of your library copies can also have the source code. You must make sure that they, too, receive the same license code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it, and you must show them how to do this.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you our license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the library. Also, as the licensee you must be notified by someone else who passed on the recipients should know that they may have it but the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot restrict its users' freedom to copy and run a program just because it has patent claims to a particular piece of software. Therefore, we limit the scope of the license to those programs whose copyright can be held in abeyance for a limited time, after which the copyright holder must agree to release the program under the license, or its successor must agree to release the program under the license. This license is intended to prevent such a situation from occurring.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is more liberal than the ordinary GNU General Public License in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally considered a derivative work for copyright purposes. This license, the GNU Lesser General Public License, permits more liberal criteria for linking other code with the library.

We call this license the "lesser" General Public License because it has less restrictions than the "greater" General Public License. It is intended to allow people to use the library in their programs without the obligation of distributing the source code. It is a special case of the ordinary General Public License for libraries. It is a special case of the ordinary General Public License for libraries. It is a special case of the ordinary General Public License for libraries.

For example, we have no objection to your linking a program with the GNU Lesser General Public Library, or to your using it to replace the GNU Lesser General Public Library in a program you write. However, we do not want you to take advantage of the ordinary General Public License for non-library programs. In particular, we do not want you to use the GNU Lesser General Public Library to avoid the restrictions of the ordinary General Public License for non-library programs. However, the Lesser General Public License provides advantages in certain special circumstances.

modified object code on the User Product (for example, the work has been installed in ROM).

The requirements to provide Installation Information does not include a requirement to continue to provide support services, warranty, or updates for work that has been modified by you or by a third party. For a network, you may be required to provide the network itself, and network may be required when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source means the complete and corresponding source code, including configuration files, for the work that you have modified, and all the source code for the components of the work that you have modified, in whatever form and under whatever license you received it, and in whatever form and under whatever license you have it available to you. It may be in a compressed or encrypted form, provided you have the key or password for uncompressing or decrypting it.

Additional Terms means terms that supplement the terms of this License by adding to or removing from the scope of the license the rights and obligations that are defined in sections 10 through 17. Additional Terms may be applied to the entire Program or to individual parts of the Program, and may differ for different copies of the Program. You may add additional terms to a copy of the Program, but you may not remove or restrict any of the rights granted by the license without regard to the additional permissions.

When you apply additional permissions to the Program, you must also apply these additional permissions to all the source code for the components of the Program that you have modified, and you must apply these additional permissions to all the source code for the components of the Program that you have modified, in whatever form and under whatever license you received it, and in whatever form and under whatever license you have it available to you. It may be in a compressed or encrypted form, provided you have the key or password for uncompressing or decrypting it.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holder of that material) supplement the terms of this License with terms:

a) Disclaiming warranty or limiting liability differently from the terms of sections 15 and 16 of this License; or

b) Requesting preservation of certain reasonable legal notices or author attributions in that material or in the copies or derivatives of that material; or

c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or

d) Limiting the use for publicity purposes of names of licensors or authors of the material; or

e) Declining to grant certain additional rights for use of some trade names, trademarks, or service marks; or

f) Requiring authorization of licensors and authors of that material to exercise or license the patents or registered designs for any technology that those contractual assumptions directly depend on those licensors and authors.

All other non-permissive additional terms are considered "further restrictions" within the meaning of section 10. If the Program as you received it, or any part of it, contains a notice stating that it is licensed under this license along with a term that is a further restriction, you may remove that term if a license document contains a further restriction but permits relicensing or conveying under this license. You may add to covered works material governed by the terms of this license if you do not remove any of the additional restrictions that may apply to covered works. For example, you may add to a covered work in object code form a library that is linked with the work, provided you do not remove such restrictions as they apply to that library.

If you add terms to a covered work in object code form, you must place in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissions or non-permissions, may be stated in the form of a separately written license, or stated as exceptions to the above requirements. Such licenses or exceptions are:

5. Termination.

You may not propagate or modify a covered work except as expressly permitted under this license. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this license (including any patent licenses granted under the terms of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) prospectively, but only as to that copyright holder, (b) provided that you cease all violation of this License, and (c) provided that you pay any copyright fees or damages for past violation. For purposes of this section, any past violation is deemed to have occurred if you have received notice of violation of this license (for example, from a copyright holder) and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies of the material or rights from you under this license. You are not required to restore the licenses of other copyright holders for copies that they have already received, but you must cease distribution and use of the material under section 10.

6. Acceptance Not Required for Having Copies.

You are not required to accept this license in order to receive or run a copy of the Program. Acceptance of this license is deemed to occur when you modify the Program. You may, however, refuse to accept the license in which case you may not use the Program and you must not distribute copies of the Program.

7. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensor to run, modify and distribute copies of the work subject to the same terms and conditions for your conveying it. You are not required to license under the same terms and conditions any material that you receive in order to run the work.

8. Disclaimers of Warranty or Limitation of Liability.

Nothing in this license shall be construed as excluding or limiting any disclaimers of warranty or limitation of liability that you have placed in the material.

9. Conveying Copies of Source Code.

Each time you convey a covered work, the recipient automatically receives a license from the original licensor to run, modify and distribute copies of the work subject to the same terms and conditions for your conveying it. You are not required to license under the same terms and conditions any material that you receive in order to run the work.

10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensor to run, modify and distribute copies of the work subject to the same terms and conditions for your conveying it. You are not required to license under the same terms and conditions any material that you receive in order to run the work.

11. Patent.

A "contributor" is a copyright holder who authorizes use under this license of the Program or a portion of the Program as a "covered work".

A contributor's "assessable patent claims" are any patent claims owned or controlled by the contributor, whether asserted by the contributor or asserted by any third party, that would be infringed by some modification, deletion, or addition to the Program, or any part of it, that is made under this license, or any part of it, that is made under this license.

Each contributor grants a non-exclusive, worldwide, royalty-free patent license under the contributor's assessable patent claims to anyone who conveys a copy of the Program or any part of it, under this license, or any part of it, that is made under this license, or any part of it, that is made under this license.

12. Conveying Copies of Source Code.

Each time you convey a covered work, the recipient automatically receives a license from the original licensor to run, modify and distribute copies of the work subject to the same terms and conditions for your conveying it. You are not required to license under the same terms and conditions any material that you receive in order to run the work.

13. Conveying Copies of Source Code.

Each time you convey a covered work, the recipient automatically receives a license from the original licensor to run, modify and distribute copies of the work subject to the same terms and conditions for your conveying it. You are not required to license under the same terms and conditions any material that you receive in order to run the work.

14. Conveying Copies of Source Code.

Each time you convey a covered work, the recipient automatically receives a license from the original licensor to run, modify and distribute copies of the work subject to the same terms and conditions for your conveying it. You are not required to license under the same terms and conditions any material that you receive in order to run the work.

15. Conveying Copies of Source Code.

Each time you convey a covered work, the recipient automatically receives a license from the original licensor to run, modify and distribute copies of the work subject to the same terms and conditions for your conveying it. You are not required to license under the same terms and conditions any material that you receive in order to run the work.

16. Conveying Copies of Source Code.

Each time you convey a covered work, the recipient automatically receives a license from the original licensor to run, modify and distribute copies of the work subject to the same terms and conditions for your conveying it. You are not required to license under the same terms and conditions any material that you receive in order to run the work.

17. Conveying Copies of Source Code.

Each time you convey a covered work, the recipient automatically receives a license from the original licensor to run, modify and distribute copies of the work subject to the same terms and conditions for your conveying it. You are not required to license under the same terms and conditions any material that you receive in order to run the work.

18. Conveying Copies of Source Code.

Each time you convey a covered work, the recipient automatically receives a license from the original licensor to run, modify and distribute copies of the work subject to the same terms and conditions for your conveying it. You are not required to license under the same terms and conditions any material that you receive in order to run the work.

19. Conveying Copies of Source Code.

Each time you convey a covered work, the recipient automatically receives a license from the original licensor to run, modify and distribute copies of the work subject to the same terms and conditions for your conveying it. You are not required to license under the same terms and conditions any material that you receive in order to run the work.

20. Conveying Copies of Source Code.

Each time you convey a covered work, the recipient automatically receives a license from the original licensor to run, modify and distribute copies of the work subject to the same terms and conditions for your conveying it. You are not required to license under the same terms and conditions any material that you receive in order to run the work.

21. Conveying Copies of Source Code.

Each time you convey a covered work, the recipient automatically receives a license from the original licensor to run, modify and distribute copies of the work subject to the same terms and conditions for your conveying it. You are not required to license under the same terms and conditions any material that you receive in order to run the work.

22. Conveying Copies of Source Code.

Each time you convey a covered work, the recipient automatically receives a license from the original licensor to run, modify and distribute copies of the work subject to the same terms and conditions for your conveying it. You are not required to license under the same terms and conditions any material that you receive in order to run the work.

23. Conveying Copies of Source Code.

Each time you convey a covered work, the recipient automatically receives a license from the original licensor to run, modify and distribute copies of the work subject to the same terms and conditions for your conveying it. You are not required to license under the same terms and conditions any material that you receive in order to run the work.

24. Conveying Copies of Source Code.

Each time you convey a covered work, the recipient automatically receives a license from the original licensor to run, modify and distribute copies of the work subject to the same terms and conditions for your conveying it. You are not required to license under the same terms and conditions any material that you receive in order to run the work.

25. Conveying Copies of Source Code.

Each time you convey a covered work, the recipient automatically receives a license from the original licensor to run, modify and distribute copies of the work subject to the same terms and conditions for your conveying it. You are not required to license under the same terms and conditions any material that you receive in order to run the work.

26. Conveying Copies of Source Code.

Each time you convey a covered work, the recipient automatically receives a license from the original licensor to run, modify and distribute copies of the work subject to the same terms and conditions for your conveying it. You are not required to license under the same terms and conditions any material that you receive in order to run the work.

27. Conveying Copies of Source Code.

Each time you convey a covered work, the recipient automatically receives a license from the original licensor to run, modify and distribute copies of the work subject to the same terms and conditions for your conveying it. You are not required to license under the same terms and conditions any material that you receive in order to run the work.

28. Conveying Copies of Source Code.

Each time you convey a covered work, the recipient automatically receives a license from the original licensor to run, modify and distribute copies of the work subject to the same terms and conditions for your conveying it. You are not required to license under the same terms and conditions any material that you receive in order to run the work.

29. Conveying Copies of Source Code.

Each time you convey a covered work, the recipient automatically receives a license from the original licensor to run, modify and distribute copies of the work subject to the same terms and conditions for your conveying it. You are not required to license under the same terms and conditions any material that you receive in order to run the work.

30. Conveying Copies of Source Code.

Each time you convey a covered work, the recipient automatically receives a license from the original licensor to run, modify and distribute copies of the work subject to the same terms and conditions for your conveying it. You are not required to license under the same terms and conditions any material that you receive in order to run the work.

31. Conveying Copies of Source Code.

Each time you convey a covered work, the recipient automatically receives a license from the original licensor to run, modify and distribute copies of the work subject to the same terms and conditions for your conveying it. You are not required to license under the same terms and conditions any material that you receive in order to run the work.

32. Conveying Copies of Source Code.

Each time you convey a covered work, the recipient automatically receives a license from the original licensor to run, modify and distribute copies of the work subject to the same terms and conditions for your conveying it. You are not required to license under the same terms and conditions any material that you receive in order to run the work.

33. Conveying Copies of Source Code.

Each time you convey a covered work, the recipient automatically receives a license from the original licensor to run, modify and distribute copies of the work subject to the same terms and conditions for your conveying it. You are not required to license under the same terms and conditions any material that you receive in order to run the work.

34. Conveying Copies of Source Code.

Each time you convey a covered work, the recipient automatically receives a license from the original licensor to run, modify and distribute copies of the work subject to the same terms and conditions for your conveying it. You are not required to license under the same terms and conditions any material that you receive in order to run the work.

35. Conveying Copies of Source Code.

Each time you convey a covered work, the recipient automatically receives a license from the original licensor to run, modify and distribute copies of the work subject to the same terms and conditions for your conveying it. You are not required to license under the same terms and conditions any material that you receive in order to run the work.

36. Conveying Copies of Source Code.

Each time you convey a covered work, the recipient automatically receives a license from the original licensor to run, modify and distribute copies of the work subject to the same terms and conditions for your conveying it. You are not required to license under the same terms and conditions any material that you receive in order to run the work.

37. Conveying Copies of Source Code.

Each time you convey a covered work, the recipient automatically receives a license from the original licensor to run, modify and distribute copies of the work subject to the same terms and conditions for your conveying it. You are not required to license under the same terms and conditions any material that you receive in order to run the work.

38. Conveying Copies of Source Code.

Each time you convey a covered work, the recipient automatically receives a license from the original licensor to run, modify and distribute copies of the work subject to the same terms and conditions for your conveying it. You are not required to license under the same terms and conditions any material that you receive in order to run the work.

39. Conveying Copies of Source Code.

Each time you convey a covered work, the recipient automatically receives a license from the original licensor to run, modify and distribute copies of the work subject to the same terms and conditions for your conveying it. You are not required to license under the same terms and conditions any material that you receive in order to run the work.

40. Conveying Copies of Source Code.

Each time you convey a covered work, the recipient automatically receives a license from the original licensor to run, modify and distribute copies of the work subject to the same terms and conditions for your conveying it. You are not required to license under the same terms and conditions any material that you receive in order to run the work.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure you are free to distribute copies of free software (and charge for them if you wish), that you can change the software and use pieces of it in new freeware, and that you are authorized to use the code in new tools.

To protect your rights, we need to make restrictions that forbid distributors to place new restrictions on the use of the software. These restrictions translate to certain responsibilities for you if you distribute copies of the library or use it in any program.

For example, if you distribute copies of the library, whether gratis or for a fee, you must also give the recipients all the rights that we give you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must ensure that the whole combination is free software. If you modify this library, you must make clear to the recipient what part was changed by what means, so the recipient can see what your modifications are. If you do not wish to publish this information, you must make a separate arrangement for providing a separate system for receiving updates to your modifications.

We protect your rights with a two-step method: (1) we copyright the library and (2) we offer you our patent grants.

To protect our patents, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipient must know that what they receive is not the original version, so the recipient can avoid patent traps. In addition, we want to make it very clear that any patent authorization will not be affected by problems that might be encountered by others.

Finally, software patents pose a constant threat to the existence of free software. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a patent license that covers the program. Therefore, we have added a provision to the GNU General Public License that prohibits patent holders from restricting the users of a free program in any way that is inconsistent with the full freedom of use specified in this license.

Most GNU software, including the library, is covered by the GNU General Public License. This license, the GNU Lesser General Public License, and the GNU Free Documentation License, are three different licenses for the GNU General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally considered a combined work, a derivative of the original library. The GNU Lesser General Public License therefore permits such linking of the library with other code with the criteria of freedom. This Lesser General Public License permits more lax criteria for linking other code with the library, as well as for the distribution of the combined work.

We call this license the "lesser" General Public License because it does less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers access to an additional user, copying and distributing, these derivative libraries. However, the Lesser License provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, to meet an end which cannot be reached by other means. In such a case, the library's license may be changed to allow its use in non-free programs. A more frequent case is that a free library does the same job as a widely used non-free library. In this case, there is little to be gained by linking the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, on the UNIX operating system, the GNU C-library is both free and non-free programs enable many more people to use the whole GNU operating system, as well as its variants, the GNU operating system.

Although the Lesser General Public License is less protective of the user's freedom, it does ensure that the user of a program that is linked with the library has the freedom and the technical support to use the program in the future.

The precise terms and conditions for copying, distribution and modification are given in the licenses. For more information, see the "work based on the library" and a "work that uses the library". The former contains copyright notices for the library, whereas the latter must be combined with the library in order to run.

GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party (the "licensor") indicating that it is licensed under this license, which is defined as "this license".

1. A library, means a collection of software functions and/or data prepared as to be conveniently linked with application programs which use the same functions and data to form executable programs.

The "library", below, refers to any such software library or work which has been distributed under "this license". A "work based on the library" means either the library or any derivative work under copyright law that is based on the library. This definition includes modifications to the library and the library combined with other code in a larger program. A "work that uses the library" means a work based on the library and a "work that uses the library" means a work based on the library, whereas the latter must be combined with the library in order to run.

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, scripts used to control compilation and any other files required to compile the work.

Activities other than copying, distribution and modification are not restricted by this license. In particular, it is permitted to copy the library for internal or private use, for teaching or testing, or for promotional or marketing purposes, on the sole basis that the library is not modified, and subject to the library's license. In addition, it is permitted to copy the library for internal or private use, for teaching or testing, or for promotional or marketing purposes, on the sole basis that the library is not modified, and subject to the library's license. In addition, it is permitted to copy the library for internal or private use, for teaching or testing, or for promotional or marketing purposes, on the sole basis that the library is not modified, and subject to the library's license.

2. You may copy and distribute verbatim copies of the library's complete source code as you receive it, in any medium, provided that you prominently and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this license and to the absence of warranty; and distribute a copy of this license along with the library.

3. You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

4. You may modify your copy or copies of the library or any portion of it, thus forming a work based on the library, and copy and distribute such modifications and the work under the terms of Section 1. However, you must meet the following conditions:

a) The modified work must itself be a software library.

b) You must cause the files and documentation to carry prominent notices stating that you changed the files and the date of any change.

c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.

d) If a facility in the modified library refers to a function or a data structure in the library, other than an as named passed onto the facility, you must make the name of the function or data structure visible in the source and the object code of the modified library.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Section 2d requires that any modification be accompanied by modifications to its description in the source and the object code so that the square root function will still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable portions of that work are derived from the library, you must make those portions identifiable and separate from the rest of the work. These requirements apply to the modified work as a whole. If identifiable portions of that work are derived from the library, you must make those portions identifiable and separate from the rest of the work.

5. In the event you decide to sublicense the library, you must also comply with the following conditions:

a) You must retain the copyright notice for the library and for any other software included in the library.

b) You must cause the files and documentation to carry prominent notices stating that you changed the files and the date of any change.

c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.

d) You must apply to the library the terms of the GNU General Public License, version 2, or any later version published by the Free Software Foundation.

6. In addition, some aggregation of another work not based on the library with the library (or with a work based on the library) is a work based on the library if the aggregate is published, distributed, sold, or otherwise made available to the public.

7. The GNU Lesser General Public License does not cover licenses for other software which may be linked to the library.

8. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

9. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

10. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

11. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

12. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

13. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

14. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

15. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

16. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

17. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

18. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

19. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

20. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

21. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

22. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

23. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

24. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

25. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

26. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

27. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

28. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

29. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

30. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

31. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

32. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

33. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

34. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

35. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

36. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

37. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

38. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

39. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

40. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

41. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

42. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

43. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

44. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

45. This license is intended to be more liberal than the GNU General Public License, which is published by the Free Software Foundation.

restricted by law if you do not accept this License. Therefore, by exercising or distributing the Program (or any work based on the Program), you indicate your agreement to this License to do so, and you indicate that you have read the provisions of this License and understand the Program or works based on it.

8. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original copyright holder to run, modify or distribute the Program subject to these terms and conditions. You may not impose any additional restrictions on the recipient's exercise of the rights granted herein, but you may impose such additional restrictions if they appear to be in the public interest.

9. If by a court judgment or agreement of patent licensee or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the provisions of this License, you must honor that other arrangement, but you may still choose to follow the terms of the License or to refuse to do so. In such cases, your license under this License does not extend to that other arrangement, but you may still choose to follow the terms of the License or to refuse to do so. For example, if a patent licensee would require you to pay a royalty for the distribution of the Program by all those who receive copies directly or indirectly from you, then you may only distribute copies of the Program if you agree to pay that royalty. If you do not pay that royalty, you may not distribute copies of the Program.

If any portion of this section is held invalid or unenforceable under applicable law, it is deemed to be severable, and this section shall nevertheless be applied and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims. This section has the sole purpose of protecting the integrity of the Free Software distribution system. Whether you wish to sue in court to enforce this section or to refuse to do so, you must honor the other arrangements that you have made with third parties. This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

10. If the distribution and/or use of the Program is restricted in certain countries either by patents or by applicable regulations, the original copyright holder who places the Program under this License may add additional geographic restrictions in those countries, but only to the extent that such restrictions are necessary to enforce the copyright law in that country. In such cases, this License incorporates the limitations of any such additional restrictions.

11. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program is licensed under a particular version of this License, you can only use that version or any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

12. If you wish to incorporate parts of the Program into other free programs, you may do so. If you are a for-profit corporation, you may wish to make a special arrangement with the copyright holder to allow you to incorporate unmodified parts into proprietary products. For example, you may wish to combine the Program with other software under the terms of the GNU Lesser General Public License, or to use parts of the Program in a proprietary product. In such cases, you may wish to contact the copyright holder to arrange a more exclusive arrangement with you.

13. If you wish to make modifications to the Program, you may do so. You may then patent the modifications you make, and you may assert your patent against third parties (for example, you may sue for patent infringement) provided that you do not make such patent a condition of any distribution you make of the Program. You may also make such patent a condition of any distribution you make of the Program, provided that you do not make such patent a condition of any distribution you make of the Program.

14. If you wish to make modifications to the Program, you may do so. You may then patent the modifications you make, and you may assert your patent against third parties (for example, you may sue for patent infringement) provided that you do not make such patent a condition of any distribution you make of the Program. You may also make such patent a condition of any distribution you make of the Program, provided that you do not make such patent a condition of any distribution you make of the Program.

15. If you wish to make modifications to the Program, you may do so. You may then patent the modifications you make, and you may assert your patent against third parties (for example, you may sue for patent infringement) provided that you do not make such patent a condition of any distribution you make of the Program. You may also make such patent a condition of any distribution you make of the Program, provided that you do not make such patent a condition of any distribution you make of the Program.

16. If you wish to make modifications to the Program, you may do so. You may then patent the modifications you make, and you may assert your patent against third parties (for example, you may sue for patent infringement) provided that you do not make such patent a condition of any distribution you make of the Program. You may also make such patent a condition of any distribution you make of the Program, provided that you do not make such patent a condition of any distribution you make of the Program.

17. If you wish to make modifications to the Program, you may do so. You may then patent the modifications you make, and you may assert your patent against third parties (for example, you may sue for patent infringement) provided that you do not make such patent a condition of any distribution you make of the Program. You may also make such patent a condition of any distribution you make of the Program, provided that you do not make such patent a condition of any distribution you make of the Program.

18. If you wish to make modifications to the Program, you may do so. You may then patent the modifications you make, and you may assert your patent against third parties (for example, you may sue for patent infringement) provided that you do not make such patent a condition of any distribution you make of the Program. You may also make such patent a condition of any distribution you make of the Program, provided that you do not make such patent a condition of any distribution you make of the Program.

19. If you wish to make modifications to the Program, you may do so. You may then patent the modifications you make, and you may assert your patent against third parties (for example, you may sue for patent infringement) provided that you do not make such patent a condition of any distribution you make of the Program. You may also make such patent a condition of any distribution you make of the Program, provided that you do not make such patent a condition of any distribution you make of the Program.

20. If you wish to make modifications to the Program, you may do so. You may then patent the modifications you make, and you may assert your patent against third parties (for example, you may sue for patent infringement) provided that you do not make such patent a condition of any distribution you make of the Program. You may also make such patent a condition of any distribution you make of the Program, provided that you do not make such patent a condition of any distribution you make of the Program.

21. If you wish to make modifications to the Program, you may do so. You may then patent the modifications you make, and you may assert your patent against third parties (for example, you may sue for patent infringement) provided that you do not make such patent a condition of any distribution you make of the Program. You may also make such patent a condition of any distribution you make of the Program, provided that you do not make such patent a condition of any distribution you make of the Program.

22. If you wish to make modifications to the Program, you may do so. You may then patent the modifications you make, and you may assert your patent against third parties (for example, you may sue for patent infringement) provided that you do not make such patent a condition of any distribution you make of the Program. You may also make such patent a condition of any distribution you make of the Program, provided that you do not make such patent a condition of any distribution you make of the Program.

23. If you wish to make modifications to the Program, you may do so. You may then patent the modifications you make, and you may assert your patent against third parties (for example, you may sue for patent infringement) provided that you do not make such patent a condition of any distribution you make of the Program. You may also make such patent a condition of any distribution you make of the Program, provided that you do not make such patent a condition of any distribution you make of the Program.

24. If you wish to make modifications to the Program, you may do so. You may then patent the modifications you make, and you may assert your patent against third parties (for example, you may sue for patent infringement) provided that you do not make such patent a condition of any distribution you make of the Program. You may also make such patent a condition of any distribution you make of the Program, provided that you do not make such patent a condition of any distribution you make of the Program.

25. If you wish to make modifications to the Program, you may do so. You may then patent the modifications you make, and you may assert your patent against third parties (for example, you may sue for patent infringement) provided that you do not make such patent a condition of any distribution you make of the Program. You may also make such patent a condition of any distribution you make of the Program, provided that you do not make such patent a condition of any distribution you make of the Program.

26. If you wish to make modifications to the Program, you may do so. You may then patent the modifications you make, and you may assert your patent against third parties (for example, you may sue for patent infringement) provided that you do not make such patent a condition of any distribution you make of the Program. You may also make such patent a condition of any distribution you make of the Program, provided that you do not make such patent a condition of any distribution you make of the Program.

27. If you wish to make modifications to the Program, you may do so. You may then patent the modifications you make, and you may assert your patent against third parties (for example, you may sue for patent infringement) provided that you do not make such patent a condition of any distribution you make of the Program. You may also make such patent a condition of any distribution you make of the Program, provided that you do not make such patent a condition of any distribution you make of the Program.

28. If you wish to make modifications to the Program, you may do so. You may then patent the modifications you make, and you may assert your patent against third parties (for example, you may sue for patent infringement) provided that you do not make such patent a condition of any distribution you make of the Program. You may also make such patent a condition of any distribution you make of the Program, provided that you do not make such patent a condition of any distribution you make of the Program.

29. If you wish to make modifications to the Program, you may do so. You may then patent the modifications you make, and you may assert your patent against third parties (for example, you may sue for patent infringement) provided that you do not make such patent a condition of any distribution you make of the Program. You may also make such patent a condition of any distribution you make of the Program, provided that you do not make such patent a condition of any distribution you make of the Program.

30. If you wish to make modifications to the Program, you may do so. You may then patent the modifications you make, and you may assert your patent against third parties (for example, you may sue for patent infringement) provided that you do not make such patent a condition of any distribution you make of the Program. You may also make such patent a condition of any distribution you make of the Program, provided that you do not make such patent a condition of any distribution you make of the Program.

31. If you wish to make modifications to the Program, you may do so. You may then patent the modifications you make, and you may assert your patent against third parties (for example, you may sue for patent infringement) provided that you do not make such patent a condition of any distribution you make of the Program. You may also make such patent a condition of any distribution you make of the Program, provided that you do not make such patent a condition of any distribution you make of the Program.

32. If you wish to make modifications to the Program, you may do so. You may then patent the modifications you make, and you may assert your patent against third parties (for example, you may sue for patent infringement) provided that you do not make such patent a condition of any distribution you make of the Program. You may also make such patent a condition of any distribution you make of the Program, provided that you do not make such patent a condition of any distribution you make of the Program.

33. If you wish to make modifications to the Program, you may do so. You may then patent the modifications you make, and you may assert your patent against third parties (for example, you may sue for patent infringement) provided that you do not make such patent a condition of any distribution you make of the Program. You may also make such patent a condition of any distribution you make of the Program, provided that you do not make such patent a condition of any distribution you make of the Program.

34. If you wish to make modifications to the Program, you may do so. You may then patent the modifications you make, and you may assert your patent against third parties (for example, you may sue for patent infringement) provided that you do not make such patent a condition of any distribution you make of the Program. You may also make such patent a condition of any distribution you make of the Program, provided that you do not make such patent a condition of any distribution you make of the Program.

35. If you wish to make modifications to the Program, you may do so. You may then patent the modifications you make, and you may assert your patent against third parties (for example, you may sue for patent infringement) provided that you do not make such patent a condition of any distribution you make of the Program. You may also make such patent a condition of any distribution you make of the Program, provided that you do not make such patent a condition of any distribution you make of the Program.

36. If you wish to make modifications to the Program, you may do so. You may then patent the modifications you make, and you may assert your patent against third parties (for example, you may sue for patent infringement) provided that you do not make such patent a condition of any distribution you make of the Program. You may also make such patent a condition of any distribution you make of the Program, provided that you do not make such patent a condition of any distribution you make of the Program.

37. If you wish to make modifications to the Program, you may do so. You may then patent the modifications you make, and you may assert your patent against third parties (for example, you may sue for patent infringement) provided that you do not make such patent a condition of any distribution you make of the Program. You may also make such patent a condition of any distribution you make of the Program, provided that you do not make such patent a condition of any distribution you make of the Program.

38. If you wish to make modifications to the Program, you may do so. You may then patent the modifications you make, and you may assert your patent against third parties (for example, you may sue for patent infringement) provided that you do not make such patent a condition of any distribution you make of the Program. You may also make such patent a condition of any distribution you make of the Program, provided that you do not make such patent a condition of any distribution you make of the Program.

39. If you wish to make modifications to the Program, you may do so. You may then patent the modifications you make, and you may assert your patent against third parties (for example, you may sue for patent infringement) provided that you do not make such patent a condition of any distribution you make of the Program. You may also make such patent a condition of any distribution you make of the Program, provided that you do not make such patent a condition of any distribution you make of the Program.

40. If you wish to make modifications to the Program, you may do so. You may then patent the modifications you make, and you may assert your patent against third parties (for example, you may sue for patent infringement) provided that you do not make such patent a condition of any distribution you make of the Program. You may also make such patent a condition of any distribution you make of the Program, provided that you do not make such patent a condition of any distribution you make of the Program.

41. If you wish to make modifications to the Program, you may do so. You may then patent the modifications you make, and you may assert your patent against third parties (for example, you may sue for patent infringement) provided that you do not make such patent a condition of any distribution you make of the Program. You may also make such patent a condition of any distribution you make of the Program, provided that you do not make such patent a condition of any distribution you make of the Program.

42. If you wish to make modifications to the Program, you may do so. You may then patent the modifications you make, and you may assert your patent against third parties (for example, you may sue for patent infringement) provided that you do not make such patent a condition of any distribution you make of the Program. You may also make such patent a condition of any distribution you make of the Program, provided that you do not make such patent a condition of any distribution you make of the Program.

43. If you wish to make modifications to the Program, you may do so. You may then patent the modifications you make, and you may assert your patent against third parties (for example, you may sue for patent infringement) provided that you do not make such patent a condition of any distribution you make of the Program. You may also make such patent a condition of any distribution you make of the Program, provided that you do not make such patent a condition of any distribution you make of the Program.

44. If you wish to make modifications to the Program, you may do so. You may then patent the modifications you make, and you may assert your patent against third parties (for example, you may sue for patent infringement) provided that you do not make such patent a condition of any distribution you make of the Program. You may also make such patent a condition of any distribution you make of the Program, provided that you do not make such patent a condition of any distribution you make of the Program.

45. If you wish to make modifications to the Program, you may do so. You may then patent the modifications you make, and you may assert your patent against third parties (for example, you may sue for patent infringement) provided that you do not make such patent a condition of any distribution you make of the Program. You may also make such patent a condition of any distribution you make of the Program, provided that you do not make such patent a condition of any distribution you make of the Program.

46. If you wish to make modifications to the Program, you may do so. You may then patent the modifications you make, and you may assert your patent against third parties (for example, you may sue for patent infringement) provided that you do not make such patent a condition of any distribution you make of the Program. You may also make such patent a condition of any distribution you make of the Program, provided that you do not make such patent a condition of any distribution you make of the Program.

47. If you wish to make modifications to the Program, you may do so. You may then patent the modifications you make, and you may assert your patent against third parties (for example, you may sue for patent infringement) provided that you do not make such patent a condition of any distribution you make of the Program. You may also make such patent a condition of any distribution you make of the Program, provided that you do not make such patent a condition of any distribution you make of the Program.

48. If you wish to make modifications to the Program, you may do so. You may then patent the modifications you make, and you may assert your patent against third parties (for example, you may sue for patent infringement) provided that you do not make such patent a condition of any distribution you make of the Program. You may also make such patent a condition of any distribution you make of the Program, provided that you do not make such patent a condition of any distribution you make of the Program.

49. If you wish to make modifications to the Program, you may do so. You may then patent the modifications you make, and you may assert your patent against third parties (for example, you may sue for patent infringement) provided that you do not make such patent a condition of any distribution you make of the Program. You may also make such patent a condition of any distribution you make of the Program, provided that you do not make such patent a condition of any distribution you make of the Program.

munidite 2.0.1

GNU GENERAL PUBLIC LICENSE
Version 2, June 1989
Copyright (C) 1989, 1991 Free Software Foundation, Inc.
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble
The licenses for most software are designed to take away your freedom of use and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software. You are not permitted to restrict others' use of copies of software you receive from them. You may, however, restrict what they can do with the copies they receive from you, under certain circumstances. We hope this license will help you to do so.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for them if you wish), that you receive source code or can get it if you wish, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether modified or not, you must make sure that anyone who receives it can get the source code, and you must also make sure that they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and modify the software.

Also, for each author's protection and ours, we want to make certain that our license actually covers everyone, for this time and in every jurisdiction. We believe that this license works best for an individual to publish under its terms, and to make certain that our license actually covers everyone, for this time and in every jurisdiction.

Finally, our license is designed to be broad, covering nearly all software authors. It is intended to be broad, covering nearly all software authors. It is intended to be broad, covering nearly all software authors.

The program source and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This license applies to any program or other work which contains a notice in the copyright notice stating it may be distributed under the terms of this license. The program or other work may be distributed under the terms of this license, or under the terms of any other license, or under the terms of no license at all. In such cases, you may choose which license you wish to apply to your copies of the program or other work.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you copy, distribute and modify the software.

2. You may charge a fee for the physical act of transferring a copy, and you may at your option charge for other services.

3. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
b) You must cause any work that you distribute or publish, that in whole or in part contains code that is derived from the Program, to be licensed as a whole at no charge to all third parties under the terms of this License.
c) If the work is a work normally considered derivative work, you must cause the work to be licensed as a whole at no charge to all third parties under the terms of this License.

4. You must cause any work that you distribute or publish, that in whole or in part contains code that is derived from the Program, to be licensed as a whole at no charge to all third parties under the terms of this License.

5. If the work is a work normally considered derivative work, you must cause the work to be licensed as a whole at no charge to all third parties under the terms of this License.

6. You must cause any work that you distribute or publish, that in whole or in part contains code that is derived from the Program, to be licensed as a whole at no charge to all third parties under the terms of this License.

7. If the work is a work normally considered derivative work, you must cause the work to be licensed as a whole at no charge to all third parties under the terms of this License.

8. You must cause any work that you distribute or publish, that in whole or in part contains code that is derived from the Program, to be licensed as a whole at no charge to all third parties under the terms of this License.

GNU GENERAL PUBLIC LICENSE

Version 3, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.
59 Temple Place, Suite 330, Boston, MA 02111-1307 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble
The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is meant to ensure your freedom and copyright holders to make sure the software is free for all its users. The General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using the License. (Some other Free Software Foundation software is covered by the Lesser General Public License instead; you can apply it to your programs.)

When we speak of free software, we are referring to freedom, not price. The General Public License is designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you can improve the software if you wish, and that you can do these things with the copies of the software, or if you modify it.

For example, if the distribution copies of most programs, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive and can give the source code. And you must also make sure that they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this License, which gives you legal protection to copy, distribute, and modify the software. If the software is modified by someone else and passed on, we need to make sure that you and not just the original author benefit and that any new problem introduced by others will not reflect on the original author's reputation.

Finally, your free program is licensed under the GNU General Public License, so that it will be the same program that others can use. To prevent this, we have made it clear that any patent must be licensed for anyone's free use of all licensed material.

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder stating it is licensed under the terms of this GNU General Public License. The Program, below, refers to any such program or other work which is licensed under this License. Each licensee is asked to be fair to others and to give back the license to the community, whether by making improvements to the Program or by redistributing and modifying it. Each licensee is asked to be fair to others and to give back the license to the community, whether by making improvements to the Program or by redistributing and modifying it.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; you must retain the notice that you received in this License and to the extent that you are modifying the Program, you must cause any modified files to carry prominent notices stating that you changed the files and the date of any change.

2. You may modify your copy or copies of the Program or any portion thereof, to suit your needs and publish or distribute the modified version under the terms of this License, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part is derived from the Program, to be licensed under the same license that you used for the Program, and you must cause any of these files to carry prominent notices stating that you changed the files and the date of any change.

c) If the modified program normally runs interactively, you must cause it, whenever it runs interactively, to print a prominent notice in each instance of its operation giving the exact title of the program as it runs, the name of the author, and the name of the organization sponsoring the program, and to accept and print the program's version number and the date of this document. In addition, you must cause any of these files to carry prominent notices stating that you changed the files and the date of any change.

d) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

e) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

f) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

g) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

h) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

i) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

j) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

k) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

l) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

m) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

n) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

o) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

p) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

q) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

r) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

s) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

t) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

u) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

v) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

w) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

x) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

y) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

z) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

AA) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

BB) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

CC) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

DD) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

EE) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

FF) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

GG) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

HH) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

II) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

JJ) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

KK) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

LL) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

MM) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

NN) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

OO) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

PP) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

QQ) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

RR) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

SS) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

TT) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

UU) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

VV) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

WW) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

XX) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

YY) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

ZZ) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

AAA) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

BBB) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

CCC) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

DDD) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

EEE) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

FFF) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

GGG) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

HHH) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

III) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

JJJ) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

KKK) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

LLL) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

MMM) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

NNN) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

OOO) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

PPP) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

QQQ) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

RRR) You must cause any modified or new files to carry prominent notices stating that you changed the files and the date of any change.

You should also get your employer (if you work as a programmer) or your school, if any, to use a copyright disclaimer for the program. If you are not the author, you should get the original author's permission. You should also get your employer (if you work as a programmer) or your school, if any, to use a copyright disclaimer for the program. If you are not the author, you should get the original author's permission.

infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that restrict the availability of this License, do not distribute the Program as you are permitted to do under this License, or you are unable to exercise the rights granted to you under this License, you may, as a last resort, distribute the Program as you are permitted to do under this License, provided that you do not do so in a way that is intended to circumvent the restrictions imposed on you by the court order, agreement or other restriction.

If any portion of this section is held invalid or unenforceable under applicable law, the balance of the section is intended to survive and the section shall be construed to give maximum effect to the law that permits the most permissive application of this License.

It is not the intent of this section to infringe any patent or other property right claim or to contest validity of any such claim. The purpose of this section is to ensure that the rights granted by the Free Software Foundation, which is authorized by public license practices, are not undermined by public license practices. Many people have made contributions to the code repository of software distribution through this system of reliance on consistent application of this system. It is in the public interest to ensure that the system of contribution remains open and that the rights granted by this License are not undermined by public license practices.

This section is intended to make clear that what is believed to be a subsequent version of the Program is not a derivative work of the Program.

8. If the distribution medium for the Program is restricted in certain countries either by patent or by copyright law, the copyright holder for the Program may, in addition to the rights granted by this License, restrict the distribution of the Program in those countries, so long as such restriction is necessary to comply with the law in those countries. The restriction shall be written in the body of this License.

9. The Free Software Foundation may publish revised versions of the General Public License from time to time. Such versions will address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of this License or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free software, you may do so by publishing your version of the Program, which is not intended to be distributed under the terms of this License, as a separate program. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation to request permission to use the Program in this way. For software which is not copyrighted by the Free Software Foundation, write to the copyright holder to request permission to use the Program in this way.

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING, THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ANY NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT SHALL THE COPYRIGHT HOLDER OR CONTRIBUTORS BE LIABLE FOR ANY DAMAGES, INCLUDING GENERAL, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, ARISING OUT OF OR IN CONNECTION WITH THE USE OR PERFORMANCE OF THIS PROGRAM, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

13. IN NO EVENT SHALL THE COPYRIGHT HOLDER OR CONTRIBUTORS BE LIABLE FOR ANY DAMAGES, INCLUDING GENERAL, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, ARISING OUT OF OR IN CONNECTION WITH THE USE OR PERFORMANCE OF THIS PROGRAM, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

14. IN NO EVENT SHALL THE COPYRIGHT HOLDER OR CONTRIBUTORS BE LIABLE FOR ANY DAMAGES, INCLUDING GENERAL, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, ARISING OUT OF OR IN CONNECTION WITH THE USE OR PERFORMANCE OF THIS PROGRAM, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

15. IN NO EVENT SHALL THE COPYRIGHT HOLDER OR CONTRIBUTORS BE LIABLE FOR ANY DAMAGES, INCLUDING GENERAL, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, ARISING OUT OF OR IN CONNECTION WITH THE USE OR PERFORMANCE OF THIS PROGRAM, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

16. IN NO EVENT SHALL THE COPYRIGHT HOLDER OR CONTRIBUTORS BE LIABLE FOR ANY DAMAGES, INCLUDING GENERAL, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, ARISING OUT OF OR IN CONNECTION WITH THE USE OR PERFORMANCE OF THIS PROGRAM, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.

Everyone is permitted to copy and distribute verbatim copies of this License document, but changing it is not allowed.

Preamble

The licenses for most software are designed to make sure you, as the user, can do what you wish with the software. For example, the only way to protect your program from being copied is to put a copyright notice on it, and to request that people who copy it pay you a certain sum of money. This is not a free license; it is a license to sell.

There are other kinds of licenses, which attempt to serve different purposes or different kinds of users. Some of the most important of these are the licenses which are used in operating systems, in programming languages, in databases, and in bookkeeping systems. This License is intended to assure you that the software you are getting is free; it will remain free, and you will be free to do as much as you wish with it. It is licensed to you, and you can copy, distribute, and modify it at will. It is licensed to you, and you can copy, distribute, and modify it at will.

For the purposes of this License, the code and documentation for a program and the code and documentation for any other program which the program interacts with to perform its function are considered to form a complete program.

Finally, we want to make it clear that this License does not address patent, trademark, or other issues. These are the areas where protection is granted by law. In many countries, patent law also covers software, and trademark law protects the names of software packages. This License is intended to assure you that the software you are getting is free; it will remain free, and you will be free to do as much as you wish with it. It is licensed to you, and you can copy, distribute, and modify it at will. It is licensed to you, and you can copy, distribute, and modify it at will.
